

Project Planning Engineer with French

" MI-GSO | PCUBED is a global team driven by excellence, creativity, and pragmatism. Our purpose is to accelerate innovation. We support companies who design and build high technology products and services – enabling a smarter, faster, safer, cleaner, and brighter tomorrow."

Your Next Challenge:

MI-GSO | PCUBED is looking for a **Project Planning Engineer with French** to join our team in **Bucharest!**

As a **Project Planning Engineer**, you will be working within our global team of Project Management Consultants. In this role, you will develop and maintain an integrated project equipment schedule to support project reporting and on time delivery analysis.

Your responsibilities will include:

- Developing critical business cases to provide consulting recommendations, proposals, and options to solve our customer's challenges;
- Working across departments and coordinate advancements of projects;
- Acts as a resource for project team members and supports with data, analysis, and root causes of schedule variances;
- Connecting with stakeholders on status reports and project development;
- Ensures reports for other functions and customers accurately reflect status of project equipment;
- Uses knowledge of best practices and how equipment schedule integrates with other source systems to solve issues as they arise.

Your profile:

- Technical degree in related field required;
- Proficiency level in **French** and good knowledge in **English**;
- You have between **3-5 years of professional experience**, ideally in a consulting or professional services role / in engineering;
- Prior planning knowledge and experience, particularly with MS Project or Primavera P6, but is not mandatory;
- Hands-on experience and general knowledge of cost management, including budgeting, change management, forecasting, and reporting;
- Strong analytical skills with demonstrated ability to synthesize large quantities of data into key messages;
- Understanding of basic project accounting principles and processes is required.

What we offer:

- Trainings and support to build your career path;
- Hybrid working environment (on-site/remote);
- 25 days of paid leave;
- A good health insurance;
- Reimbursement of the transport pass (80 lei net/month);
- Restaurant tickets.
